HEADQUARTERS

Nakanoshima Qross

It is a unique hub where has opened in June 2024 for the industrialization of future medicine, where medical institutions, companies, startups, support organizations, etc. come together under one roof.

- CIRA Foundation, which will manufacture and stock quality-assured iPS cells and provide them to academic research institutions and companies. They have opened [Yasui Facility for my iPS Cell Therapy](#) in this spring.
- PMDA (Pharmaceuticals and Medical Devices Agency) is Japanese regulatory agency. They protect the public health by assuring safety, efficacy and quality of pharmaceuticals and medical devices.

The details of Nakanoshima Qross

KENTO

In the area spanning Suita city and Settsu city, urban development is being promoted under the concept of “Health and Medicine.” Centered around two national research institutions - the National Cerebral and Cardiovascular Center and the National Institute of Health and Nutrition - companies and organizations are gathering to advance open innovation in the field of health and medicine.

- The National Cerebral and Cardiovascular Center (NCC) is a medical center with a hospital and an institute for research and medical training.
- The National Institute of Health and Nutrition (NIHN) is working on research and development with the goal of achieving a society where people live healthy and long lives.
